10 Things You Need to Do if You're Involved in a Car Accident

1. Move your car out of moving traffic lanes and stop.
2. Get names and contact information from any potential witnesses at the scene.
3. Do not move anyone unless you are absolutely sure that you can do so safely.
4. Call **911** and tell them your location and about any injuries at the scene.
5. Don't apologize, admit your fault or argue with the other driver. That can all be sorted out later.
6. Exchange insurance information and get the other driver's name, current address, phone number, and license number. Do not permit anyone to photograph your license. That could lead to identity theft.
7. Document and, if possible, take photographs of the license plates and damage to all vehicles involved.
8. Obtain a copy of any police or crash report if available at the scene.
9. If your car is being towed, retrieve your personal items and confirm where it's being taken.
10. Call **Halunen Law** at **(612)444-HURT**. Get legal advice on your rights and responsibilities. We can assist you in protecting the evidence and getting the insurance benefits and compensation to which you are entitled.
